

# The provider for Cables

ideas and experience

# Cables

As one of the major suppliers for ignition- and ionisation electrodes we offer a great variety of cables, connectors and insulation material, which are necessary for contacting.

Our cable assembly is set up to produce large production runs on modern fully automated machines. For greater flexibility as well as prototyping hand tools or semiautomatic machines are used. All commonly used contacts, lead qualities and insulation materials are available from stock. For EMC purposes we offer several effective solutions. We are your partner!

Challenge us!

## **quickest possible realization of your design ideas by our specialists**

- in house CAD • tool shop • ceramic production • assembly
- plastic injection molding • hot melt

## **know how**

- silicone/PTFE/MFA/glas filament wicker • plug in connections, angled or straight
- insert molded-, heat shrinking sleeve-, plastic insulation • materials for special applications

## **long term co-operation with**

- performance oriented suppliers for connectors, insulation materials and cables
- reputable institutes and universities • suppliers for spark controllers and generators

## **close collaboration with customers during the phase of product research and development**

- process oriented • economic • long lasting • reliable

## **Flexible production- and logistic concepts**

- modular systems • customer specific solutions • worldwide network
